

Respiratory Illness Report

Student Name: _____

Date: _____

SYMPTOMS

Students who display one or more symptoms from Part 1 are considered to have a respiratory infection of some sort. Students who have experienced possible exposure to COVID-19 as indicated in Part 2 are considered to have a respiratory infection that could likely be COVID-19.

Part 1: Medical Symptoms		
<input type="checkbox"/> Fever (100F or higher) or chills	<input type="checkbox"/> Muscle or body aches	<input type="checkbox"/> Congestion or runny nose
<input type="checkbox"/> Cough	<input type="checkbox"/> Headache	<input type="checkbox"/> Nausea or vomiting
<input type="checkbox"/> Shortness of breath or difficulty breathing	<input type="checkbox"/> New loss of taste or smell	<input type="checkbox"/> Diarrhea
<input type="checkbox"/> Fatigue	<input type="checkbox"/> Sore throat	
Part 2: Possible Exposure to COVID-19		
<input type="checkbox"/> Has had close contact (within 6 feet for at least 15 minutes) with a person with confirmed COVID-19 including a family member currently diagnosed with COVID-19		
<input type="checkbox"/> Has had close contact (within 6 feet for at least 15 minutes) with an immediate family member or another person under quarantine for possible exposure to COVID-19		
<input type="checkbox"/> Traveled to an area where the local health department is reporting high numbers of COVID-19 cases as described in the Ohio Travel Advisory system		
<input checked="" type="checkbox"/> Lives in an area of high community transmission as described in the Public Health Advisory System by Ohio Department of Health		

Red → X Your child has displayed the symptoms listed under "Medical Symptoms". We have asked them to answer the first two questions under "Exposure to COVID-19" and have recorded their answers as given, or may have asked you to answer them. We have answered the last two questions based upon information available at www.coronavirus.ohio.gov.

This assessment does NOT diagnose your child with any specific illness. If another family member has also experienced similar signs/symptoms, consultation with a medical professional is strongly recommended to rule out COVID-19 infection.
